SUMMARY

Data analyst with 5 years of experience in supply chain, credit risk, and financial reporting analytics. Build Power BI dashboards used daily by supply chain leaders, automate SAP/CRM feeds into AWS, and model API data in BigQuery with dbt. Strong at clean SQL, aligning teams on metric definitions, and replacing manual reports.

SKILLS

- Query & Modeling:** SQL, dbt, Google BigQuery, data modeling, ETL, DuckDB
- BI & Reporting:** Power BI (DAX, Power Query), Microsoft Fabric, Excel
- Programming & Stats:** Python (pandas, scikit-learn), SAS, SPSS
- Cloud & Automation:** AWS (S3, Glue, Athena, Lambda), GCP, Power Automate, Apache Airflow
- Delivery:** Data quality & lineage, UAT/QA, SOX audit support, requirements workshops, JIRA, SAP/CRM data

EXPERIENCE

Cardinal Health Jan 2026 – Present
Data Analyst, Supply Chain Analytics (Contract) Remote

- Build and maintain 8 Power BI dashboards that 15+ supply chain leaders use daily to track inventory exceptions across 3 regions, replacing a 4-hour weekly manual report.
- Automated 6 data extracts from SAP and CRM into AWS S3 using Python, cutting file handling per cycle from ~3 hours to 20 minutes.
- Introduced a 12-point QA checklist for UAT sign-off that stopped 3 recurring data defects from reaching downstream compliance reports.
- Wrote reusable SQL templates for root-cause questions from 4 operations teams, cutting turnaround from 2 days to ~4 hours.

Discover May 2025 – Dec 2025
Data Analyst, Credit Risk Analytics (Contract) Remote

- Brought 5 REST API/JSON data feeds into BigQuery and modeled them with dbt, extending risk monitoring to a \$2B+ loan portfolio.
- Rebuilt a reconciliation model in Excel and Power Query across 3 ledger sources, cutting month-end reporting prep from 3 days to 1.
- Set up automated refresh monitoring with Power Automate and Microsoft Fabric, cutting Power BI refresh failures ~70% for 12 users.
- Led 8 SME workshops to agree on metric definitions (documented in JIRA), cutting requirements rework ~40%.

Cognizant May 2020 – Nov 2023
Data Analyst, US Financial Services Clients Hyderabad, India

- Built data quality checks and lineage documentation in SharePoint for SOX audit readiness; passed 2 formal audits with no data-quality findings.
- Built customer segmentation analysis in SQL, SAS, and SPSS on 200K–500K records for 2–3 business teams.
- Created reusable data pipeline templates on AWS and GCP that cut ad hoc data pull requests by about 30%.
- Wrote ETL, UAT, and QA runbooks that helped 3 new analysts get up to speed about 40% faster.

PROJECTS

Credit Risk Analytics Pipeline | dbt • DuckDB • Airflow • Python Jan 2025 – Nov 2025

- Modeled borrower, loan, and payment data in 3 dbt layers into a portfolio KPI scorecard (collection efficiency, risk tiers, delinquency/NPA flags); orchestrated with Airflow, with schema and custom data tests.

AWS E-Commerce Churn Analytics | S3 • Glue • Athena • Lambda • scikit-learn • Power BI Apr 2024 – Dec 2025

- Built a serverless pipeline from raw CSVs to Power BI; found ~60% of customers bought once; ranked churn risk with a Random Forest model.

EDUCATION

M.S., Computer and Information Sciences, California State University, San Bernardino • GPA 3.8/4.0 May 2025

B.Tech, Electronics and Communication Engineering, Vasireddy Venkatadri Institute of Technology, India • CGPA 8.75/10 Jun 2020
