PROFESSIONAL SUMMARY

Senior Data Analyst with 4+ years of experience across SaaS, healthcare, and financial services, turning complex multi-source data into dashboards and analysis that drive decisions. Identified **\$500K+ in recoverable margin** at Cardinal Health and cut manual reporting time **~80%** at Atlassian. Known for aligning business and technical teams on metric definitions and building data-quality checks that stakeholders trust.

TECHNICAL SKILLS

Languages & Querying: SQL, Python (pandas, scikit-learn), R

BI & Visualization: Power BI (DAX, Power Query), Tableau, Excel (Power Pivot, advanced formulas)

Data Platforms: Snowflake, Google BigQuery, Amazon Redshift, PostgreSQL, SQL Server

Data Engineering: ETL/ELT, data modeling, dbt, Apache Airflow, Alteryx, AWS (S3, Glue, Athena, Lambda), GCP

Business Systems & Process: SAP ECC / S/4HANA, Jira, Confluence, Git, Agile/Scrum, requirements gathering, UAT, data governance

PROFESSIONAL EXPERIENCE

Atlassian

Jan 2026 – Present

Senior Data Analyst (Contract)

Remote, USA

- Designed **8 Power BI dashboards** integrating Jira, Confluence, and Snowflake data, giving 5+ program leads a single source of truth for KPIs and delivery tracking across 3 teams.
- Automated recurring reporting with Python, SQL, and Excel, cutting manual tracking **~80% (3 hrs → 30 min per week)** and improving accuracy of resource planning and backlog visibility.
- Ran root-cause analysis on project performance trends and surfaced execution gaps in Power BI, leading to a revised sprint-intake process **adopted by 3 teams**.
- Built standardized Jira and Confluence reporting structures, improving traceability of analytics deliverables.

Cardinal Health

May 2025 – Dec 2025

Data Analyst (Contract)

Remote, USA

- Analyzed Medical Chargebacks and Negative Margin data with SQL and Tableau, identifying 3 recurring dispute drivers and **\$500K+ in recoverable margin** for the finance team.
- Built data-prep workflows in Alteryx, Python, and BigQuery to profile, cleanse, map, and validate **50K+ healthcare records**, catching data-quality issues before they reached finance reporting.
- Mapped upstream and downstream chargeback processes across SAP ECC and S/4HANA, documenting system dependencies and identifying automation opportunities for the operations team.
- Standardized data governance and requirements documentation, making healthcare reporting repeatable and audit-ready.

IBM

May 2020 – Nov 2023

Data Analyst

Hyderabad, India

- Developed SQL and Python analyses across enterprise datasets of **1M+ rows**, translating business requirements into structured insights that standardized reporting for 3 stakeholder teams.
- Built and validated ETL pipelines into Snowflake, testing transformations and source relationships to improve data quality and reliability of downstream reporting.
- Validated data models, mappings, and transformation logic through documented test cases, resolving **8 data-quality issues** before they reached production reports.
- Optimized Tableau dashboards and KPI reporting for financial services clients, helping stakeholders spot trends faster.

PROJECTS

AWS E-Commerce Churn Analytics Pipeline

github.com/Reyazgitwork/aws-ecommerce-analytics-pipeline

- Built a serverless pipeline (S3, Glue, Athena, Lambda) and a Random Forest churn model on 7 features; found **~60% of customers bought only once** and delivered a ranked churn-risk list in Power BI.

Credit Risk Analytics Pipeline (dbt + Airflow)

github.com/Reyazgitwork/credit-risk-dbt-pipeline

- Modeled borrower, loan, and payment data in 3 dbt layers (6 models) with schema and custom tests, orchestrated in Airflow, producing a tested portfolio health scorecard.

EDUCATION

M.S., Computer and Information Sciences — California State University, San Bernardino

Jan 2024 – May 2025

GPA: 3.8/4.0 | Coursework: Database Systems, Machine Learning, Data Mining, Cloud Computing, Statistical Analysis

B.Tech., Electronics and Communication Engineering — Vasireddy Venkatadri Institute of Technology, India

Jun 2016 – Jun 2020
